INTRODUCTION OF XCMG

Founded in 1943, XCMG is a multinational corporation with the most comprehensive range of competitive, influential products in the construction machinery industry. Our business covers eight key areas: construction machinery, heavy trucks, mining machinery, sanitation machinery, machinery components, construction, finance, and the ICT industry.

XCMG has established a global R&D network with a total of six centers in China, the US, Germany, Brazil and India, with the China national technology center at its core. In addition to a number of manufacturing bases in China, the US, Germany, the Netherlands, Poland, Austria, Brazil, India, and Uzbekistan, we possess two complete machine brands (XCMG, Schwing), and several component brands including FT and AMCA. The strength of this global R&D network and the manufacturing operations made XCMG the industry-leading global construction equipment manufacturer that it is today.

For more than 30 years, XCMG has been sowing the seeds of overseas development as the No. 1 exporter in China's construction machinery industry. Today, we have 42 branches and offices, 315 distributors, and 526 contractors in 188 countries and regions worldwide and are still growing rapidly.

XCMG IN EUROPE

Since its foundation in 2012, XCMG is gradually establishing a complete network including: R&D department, local distribution, supply chain management and an integrated customer services and training center. Nowadays, with 3 branches, XCMG has over 100 multinational employees in Europe, of which more than 50 % are R&D engineers:

Our local professional R&D team and our cutting-edge innovation platform guarantee that our products are carefully crafted to the smallest detail according to the diverse needs of European customers.

► Performance meets Efficiency

Designed to combine power and smoothness, the XE80E is ready to take on the challenge. This short-tailtwo-piece boom machine can easily perform on your jobsites even in confined spaces. Its versatility is enhanced by two standard hydraulic circuits (AUX1 & AUX2) and precise oil flow control. High digging and lifting performance together with smooth driving performance make this XE80E complete.

- The Kubota V3307 Stage V common rail diesel engine with EGR, DOC, and DPF technology matches excellently with our improved hydraulic load sensing system. This combination ensures fuel-efficient and smooth control, regardless of its load. Our powerful XE80E thus has become more fuel efficiency even under heaviest circumstances and is a pleasure to operate.

Compact design

The boom swing function together with the short tail swing allows you to work in very narrow areas. The left and right boom swing angle is respectively 62° and 50°, which makes the XE80E easy capable to realize complex tasks in difficult operation conditions like digging parallel to a wall in a narrow driveway.

Two Piece boom design

The XE80E equipped as a two-piece boom so you can take on tougher jobs in a wider range of sites. Furthermore, with its easy to control and smooth operation the extra versatility even under difficult working conditions minimizes operator fatigue.

In full control of your hydraulic system

The XE80E is standard equipped with proportional controlled AUX1 and AUX2 lines and has quick coupler lines standard available. From the monitor you can program multiple attachments.

Safety first

Together with the blade-holding valve, we provide the boom and arm safety valves as a standard configuration. It will make sure that you can handle all you are digging and lifting tasks in the safest way.

► Ergonomic and Comfortable

The XE80E is designed to provide you with the best working conditions. The cab has a wide entrance door, which makes it more accessible. The OPG/TOPS/ROPS(ISO 3471) cabin maximizes your safety.

► Easy Service Access

Our XE80E was developed with particular attention to easy service access. With a single access point for the daily maintenance of all main components, fuel level gauge, and refueling through the lockable cap.

One-sided Engine Maintenance

The XE80E is designed for lower maintenance cost with longer service intervals - resulting in more machine availability on-site. Meanwhile, skilled XCMG-trained technicians are available to provide extra support when needed.

- The lifting capacity is based on the ISO10567 standard.
 - * = The maximum lifting capacity is limited by the hydraulic capacity of the machine.
 - The lifting capacity does not exceed 87 % of the hydraulic capacity or 75 % of the tipping load with the machine on level and firm ground.
 - The operator should be familiar with the machines operating- and maintenance manual.
- Local regulations concerning the safe operation of machinery must be followed at all times.
- The lift diagrams only covers machines that are originally built by XCMG: without lifting chains and any other lifting equipment.
 - When the excavator is used to lift or handle materials, it must comply with local regulations and be equipped with the necessary hose burst valves and an overload warning device complying with EN474-5.
